## Objective

---

My goal as a Junior React developer is to gain experience enough to create highly scalable applications that are user friendly and user centered.I also intend to understand the fundamentals of backend development as i progress in my career.

## Skills

---

- React js Library
- Redux
- HTML 5
- CSS3
- Javascript and ES6

## Projects

---

- **Amazon Clone Web Application**
  - This is a side project for the amazon store clone.
  - Technology stack used:Stripe,React js,React redux,Firebase
  - Main value gained was adding checkout component for live payments
  - Github link to project:[https://github.com/MwangiJim/Amazon\\_clone\\_react-application](https://github.com/MwangiJim/Amazon_clone_react-application)
- **Twitter Clone Web application**
  - Project largely based on implementation of redux to facilitate posting tweets.
  - Technology stack used:React js,react redux,Firebase and NEWS API(to fetch top-trending news)
  - Implemented dark theme in the web application.
  - Github link:<https://github.com/MwangiJim/twitter-react-clone-app>
- **Linkedin clone application**
  - This application facilitates authentication and posting supported by Redux(as a clone)
  - Technology stack used:Firebase(for authentication),Redux(Storage of states) and React js(for creation of components)
  - Challenges faced included:creating an exact look-alike Ui/ux design of the linkedin clone
  - Github link:<https://github.com/MwangiJim/linkedin-react-clone-app>

## Experience

---

- **Kenya National beureau Of Statistics** 25th July - 14th August  
Enumerator  
I had the responsibility of keeping statistics of the people in my area and tabulating the data for my supervisors

## Education

---

- **Technical University of Kenya** 2022  
Bachelor of Computer Technology  
N/A - Final year
- **Mamgu High School** 2017  
High school Certificate  
B+

### Interests

---

- Travelling
- Video gaming
- Web development

### Languages

---

- English
- Kiswahili
- German

### Personal Details

---

- Nationality : Kenyan
